

PROBLEM SOLVING IN MATH 101

A STEP-BY-STEP LOOK AT HOW TO MASTER
PROBLEM SOLVING SKILLS.

RECORD GIVEN INFORMATION

In this step we focus on the information given that will help solve the problem. How can you let the necessary information stand out in a Math word problem? You could highlight or underline relevant information, or cross out any irrelevant information!

RECOGNIZE WHAT YOU NEED TO FIND OUT

In this step we focus on what the question is asking to find or to determine. This may seem obvious, but this step will help decide the path to the solution so it should not be overlooked!

USE BEST SOLUTION

In this step we focus on what the best solution is to turn a complicated answer into simple calculations.
